BUILD A JEDI STEALTH RECON SHIP!

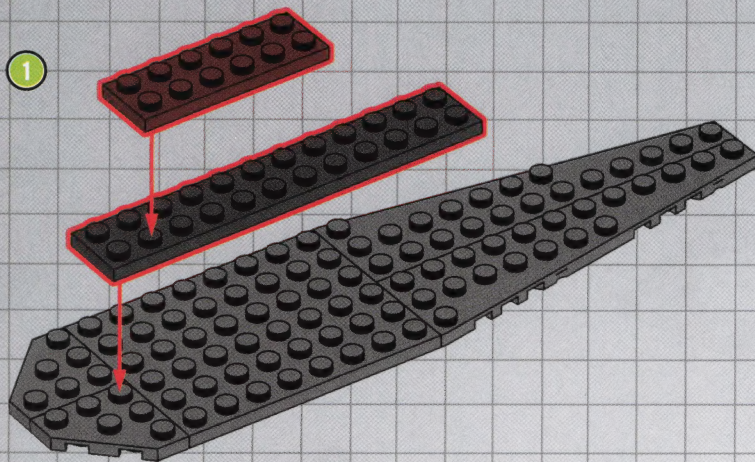

PAGE 1

Designed to slip past Separatist sensors on secret missions for the Republic, the Jedi Stealth Recon Ship really comes in handy when a new Jedi Knight like Nahdar Vebb needs to track down the villainous General Grievous! Its angular shape and dark coloration hide the starship from enemy scans and sneaky probe droids, and its oversized engines let the Jedi pilot get away in a hurry if its presence is detected.

You can build the Jedi Stealth Recon Ship using pieces from 8095 General Grievous' StarFighter! ■

BRICK-OR-TREAT AT LEGOLAND® CALIFORNIA!

BRICK-OR-TREAT TRAIL

October 2/3, 9/10, 16/17,
23/24, 30/31

Celebrate Halloween at LEGOLAND California on the kid-sized Brick-or-Treat Trail! It's a fun and safe way for kids under 13 to gather candy and other goodies, as they visit seven uniquely themed Treat Stations. Want to take a photo to remember the fun? Castle Hill and Land of Adventure will be decorated for Halloween as well as a giant LEGO pumpkin for plenty of photo opportunities for the whole family!

The Brick-or-Treat Trail will be open weekends in October, sponsored by Union Bank.

BRICK-OR-TREAT PARTY NIGHTS

October 2, 9, 16, 23, 30 From 5pm - 9pm

Don't miss Brick-or-Treat Party Nights! Monstrously themed areas such as Land of Adventure and Castle Hill will be open until 9pm for action and excitement. Along with more than 60 rides, shows and attractions, little ghosts and goblins will enjoy special activities including nighttime costume contests with prizes for the best costume. Guests can enter in three categories: HEROES, LEGO and CREATIVE. Second and third place winners from each category will receive a LEGO gift basket with four LEGOLAND California Resort Hopper Tickets. The grand prize winners will receive a LEGO gift basket with four LEGOLAND California Resort Memberships! Enjoy ghoulish entertainment with the Boo Crew and an all-new Show! Also, don't miss Howler of the Hour contest, live music, specialty acts, a LEGO Pumpkin building activity and more! Visit LEGOLAND.com for more event information, prices, times and schedules.

LEGO Models Rock NEW YORK!

On June 24th 2010, something BIG happened in the Big Apple when tourists, citizens and LEGO Fans of all ages came together to attend the grand opening of the brand-new LEGO Store in New York City's Rockefeller Center!

But this was no ordinary LEGO Store. As one of a select few new Flagship stores, the Rockefeller Center location is filled with amazing and unique LEGO brick creations, ranging from intricately detailed scenes of New York City life to a towering giant robot, all designed and built as a collaboration between the famous LEGO Master Builder team and a team of talented adult Fan builders from the New England LEGO Users Group (NELUG).

Take a look at some of the dozens of incredible new LEGO sculptures that can be spotted in the Rockefeller Center store. As an exclusive treat for LEGO BrickMaster readers, we've even interviewed the builders to find out what they have to say about making their one-of-a-kind creations! ■

NEW YORK CITY SKYLINE

"This model was great to work on because of its micro-scale proportions. Typically, we create models at either life-size or to the scale of a LEGO mini-figure.

This model required me to design at a much smaller size. I really enjoyed the opportunity to use a lot of different building techniques to recreate the various building types required. I am new to the world of micro-scale building, but anything with so much flexibility in technique is great in my book."

— Peter Donner, LEGO Model Builder

BIKE MESSENGER

"Building a MINILAND-scale model of a man riding a bike sounded like an easy assignment until I tried to attach that man to the bike. It took several tries, but what really brought the model to life was adding the messenger bag. Having it look as if it was sailing by him added an element of speed to the model."

— Mark Roe, LEGO Model Builder

"I really enjoyed **EXPLORING** the **LIMITLESS** possibilities that exist when working with this scale."

ROCKEFELLER CENTER PLAZA

"I built the Prometheus statue and ice skating rink based on photographs. The 'ice' in the rink is built using a 'studs not on top' method so the surface would be smooth and look like real ice."

— Paul Chrzan, LEGO Model Builder

MOVIE SCENE FILMING

"Who doesn't love movies and MINILAND-scale LEGO figures? I know I do. MINILAND is one of the many sights to see at the LEGOLAND parks. The goal with MINILAND is to recreate real life locations using a figure scale between four and six inches tall. I really enjoyed exploring the limitless possibilities that exist when working with this scale. From creating the accessories to the people that populate the scene, this was a truly enjoyable experience."

— Peter Donner, LEGO Model Builder

TICKER TAPE PARADE

"All the knowledge I have of ticker tape parades comes from photographs, so that's what inspired my model. It includes a convertible car with people waving out of the back, streets lined with people, and a police escort. Because of time constraints on designing the model, I chose to do it at minifigure scale. For a final touch, I added 1x1 white plates and tiles on the ground to look like ticker tape."

— Mark Roe, LEGO Model Builder

HORSE AND BUGGY

"This was built by Jonathan Dallas. The team members attempted several designs for the wheels on the horse and buggy, but finally settled on a design using skeleton legs, which made nice to-scale spokes."

— David Gwon, NELUG Team Leader

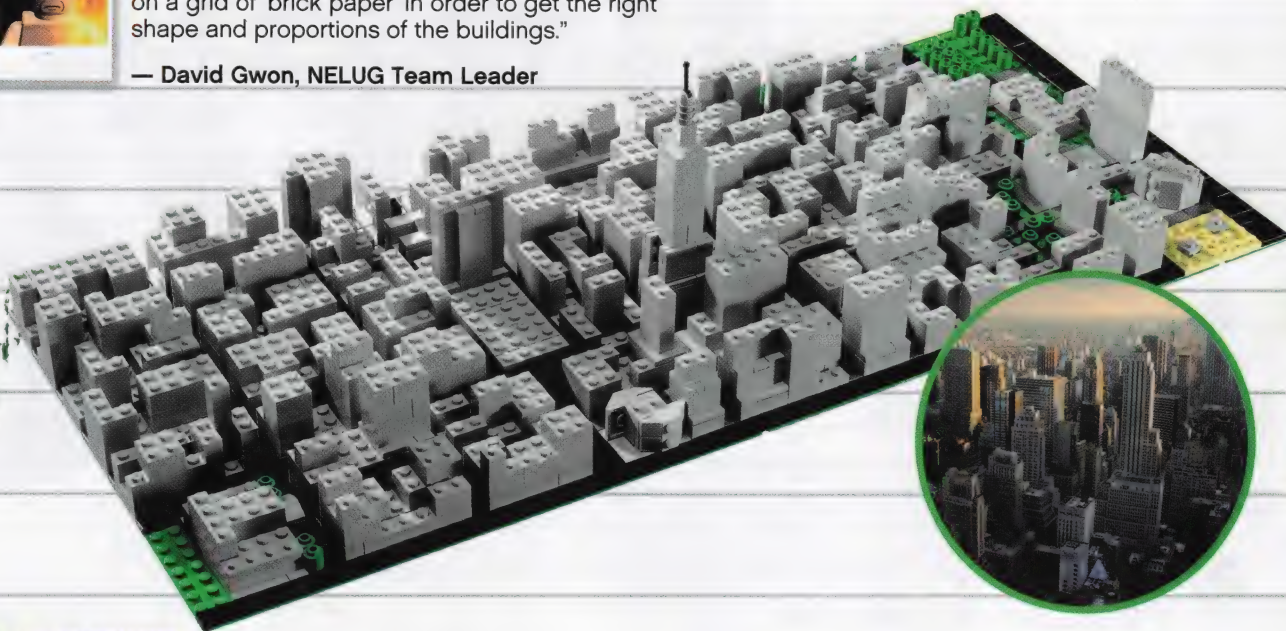

BIRD'S EYE VIEW OF MANHATTAN

"Jon created the bird's eye view of the Manhattan skyline by finding a good map and overlaying it on a grid of 'brick paper' in order to get the right shape and proportions of the buildings."

— David Gwon, NELUG Team Leader

A CONCERT IN CENTRAL PARK

One of the highlights of the Rockefeller store's LEGO sculpture display is a spectacular model of an outdoor concert taking place in New York's Central Park, created by David Gwon's team of builders from the adult LEGO Fan community.

"When the project was originally proposed, it sounded like a great opportunity. It was fairly open-ended, in that from a two or three-word description of a proposed piece like the Central Park Concert, it was our decision how to make that come alive.

"One challenge was to make sure that all models used only elements available on the Pick A Brick selection offered by LEGOshop.com, so if visitors to the store wanted to try and replicate the models, they would at least have the parts available to do so.

"The design process started by searching for reference photos and letting the creative juices flow. Generally, we have a picture in our mind's eye of what we'd like to see in the end, and we try to meld our ideas with the parts that we have to work with.

"It's a GREAT MOMENT when you've come up with a DESIGN and a METHOD to achieve that design that you're happy with."

"We also don't view LEGO bricks as only having the stud on top. We ask ourselves what we can achieve by attaching a piece differently so that the studs are on their sides, at an angle, rotated, or even upside-down. It's always good to think outside the box. Instead of saying to yourself, 'I know this piece is good for this,' ask yourself, 'What if I moved it this way? Then what can I do with it?'

"Texture and color are important as well. If what we're designing is too smooth, we'll try to add pieces that give the eye something to catch on to make things visually interesting. Too many colors on the same design can really confuse the eye, so we try to avoid that. Keeping to one

main color and adding bits of other colors here and there can make the details really show up well.

"It's a great moment when you've come up with a design and a method to achieve that design that you're happy with. From personal experience, it's not uncommon for me to

give a shout of 'Ah-ha! Yes!' and do a little happy dance when something comes out the way I want it. Granted, people around you who aren't LEGO fans may think you're strange. Then again, so will some other fans, but they'll at least smile knowingly. That's one reason why it's great having your own LEGO building room.

"The most important part of any project is that you have fun doing it. Even though there were many sleepless nights and lots of hard work, it was a great experience being involved with this project, and we all were very satisfied with what we produced."

— David Gwon, Team Leader

David Gwon and his team consisting of Linda and Jonathan Dallas are members of NELUG, the New England LEGO Users Group, a club for adult LEGO builders based in New England.

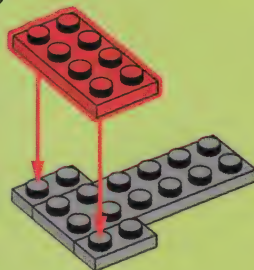

BUILD A SPACE SCOUT CRAFT!

PAGE 1

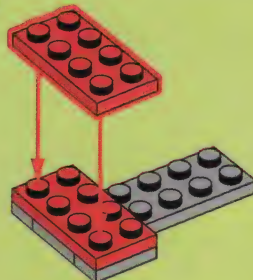

This mini space vessel is used to scout new trade routes and keep an eye out for intergalactic pirates. You can build it using pieces from 5892 Sonic Boom, or use pieces from your own LEGO collection. ■

BUILD THE LIBERTY BELL!

PAGE 1

The Famous Liberty Bell was originally ordered in 1751 for use in the Pennsylvania State House (now Independence Hall). In March of 1753, the bell acquired its famous crack during testing. Legend states that it was rung on July 8th, 1776, to summon citizens to hear a reading of the Declaration of Independence, but most historians now doubt the truth of that story. It later became a symbol of Freedom for the anti-slavery movement in the 19th century.

You can build your own Liberty Bell using pieces from your LEGO collection. ■

LEGO CITY

LEGO® "TERRIFIC TOWN" BUILDING CHALLENGE!

You've seen the amazing models that LEGO Master Model Builders and Fans built of famous sites in New York City. Now it's your turn to show us what you can do!

Build a model of something that could make your town or city a better place to live. It could be a new park, a shopping center, a new school, or anything else that you think might make the place you live a "terrific town."

ONE GRAND PRIZE

\$100 LEGO Gift Card

\$500.00 LEGO Education gift certificate for your school

FOUR FIRST PRIZES

\$100.00 LEGO Gift Card

HERE'S HOW TO ENTER:

- 1 Build a model of your "terrific town" structure using pieces from your LEGO collection.
- 2 Take a color photograph of your model. Only color photos and glossy photo quality print-outs will be accepted – no Polaroids please!
- 3 Send the photo, along with your name, age, address, daytime telephone number, name and address of your school, and the name of your model to:

Terrific Town Building Challenge
PO Box 1625
Enfield, CT 06083 -1625
